

Katrina Johnson, Professor Lionel Johnson, School of Architecture and Interior Design, J.N. Andrews Honors Program, Andrews University

ABSTRACT

The Atlanta Beltline Mixed-Use Development is a vibrant, sustainable public space within the urban fabric of Krog Street, Atlanta. The project encourages neighborhood rejuvenation and reconciles interests of developers and locals, while examining the neighborhood context and zoning ordinances. Fall 2023 marked completion of the initial design, spearheaded by the theme "rejuvenate," achieved by including natural elements, places for holistic wellbeing, and inclusive social spaces. Spring 2024 is dedicated to design refinement, specifically sizing structural elements and designing wall assemblies. This development ensures sustained vitality within Krog Street and contributes to the long-term success and resilience of the entire neighborhood.

METHODOLOGY

- Researched the Krog Street district in Atlanta, GA demoraphics such as poverty, income, education, median house values.
- Visited the site to investigate and measure the property. Examined terrain, surrounding neighborhood, noise levels.
- Gathered site information like climate, traffic, sunlight, wind, noise levels, surrouding buildings, proximity to public transportation system.
- Investigated zoning ordinances and code allowances.
- Examined precedents.
- Developed a design concept based on chosen guiding principle, "Rejuvenate." Sketching, as seen to the right, was paramount.
- Culminated with presenting the preliminary design concept at the studio review in December, including exterior, interior, and landscaping concepts.
- Designed structure, HVAC systems, and reconciled topography with the building structure.

25' 50' RESULTS

- Gym facilties for adults • Healthy sandwich shops and smoothie bar

- Outdoor gym equipment, seating and play area
- Public gardens and water features
- Design Inspiration:
- limestone.
- Children in the city: create a safe space for all ages • Building fronts: allow the building to wrap the streets and encourage street life
- Short passages: allow natural light to flow, place internal windows, furnishings, create a gateway experience, limit the length
- Public outdoor room: create sufficient space to gather and encourage natural activity but allow people to define the space themselves

- The project culimnates in the design of a successful mixed-use development in the Krog Street district that positively impacts the community. Facilities include: • Gymnastics center for children and teens
- Local clothes designer
- Outdoor apparel shop
- The development utilizes traditional Atlantan architectural styles and materials such as brick and
- Plaza layout is inspired from European plazas such as Piazza del Campo in Siena, Italy.
- Patterns present in the project:

CONCLUSIONS

The project improves the community by meeting the following needs:

- Poverty and employment
- New job opportunities
- High tech companies
- Local vendors
- Education
- Aftercare for kids
- Promote physical fitness
- (gymnastics, outdoor gear retailer)
- Specialized tech companies provide internships Rent burden and housing
- High rent burden near the site means more than 30% income is spent on rent
- Providing apartments of varying levels of affordability and luxury

Health and environment

- Passive solar heating and shading
- Roof terraces for additional outdoor space
- Native plants and trees
- Environmentally sustainable materials
- Rain coverage
- Physical activity is encouraged
