

Managing Default Printers in Windows 10

1. Go to **Start** > **Settings** or press **Windows + I**
2. Select **Devices**
3. Select the **Printers & Scanners** tab
4. Under the section “Let Windows manage my default printer”, toggle the setting to **off** as indicated below.

5. For additional options, scroll down to **Devices and printers** the same window. This will allow you to perform tasks like install and configure options for your printer.
